

Caulking is optional.
Do not caulk if Spider™ DROP-IN™ Damper is going to be removed for periodic cleaning purposes.

Sleepy Hollow Chimney Supply, Ltd.
Spider™ DROP-IN™ Damper

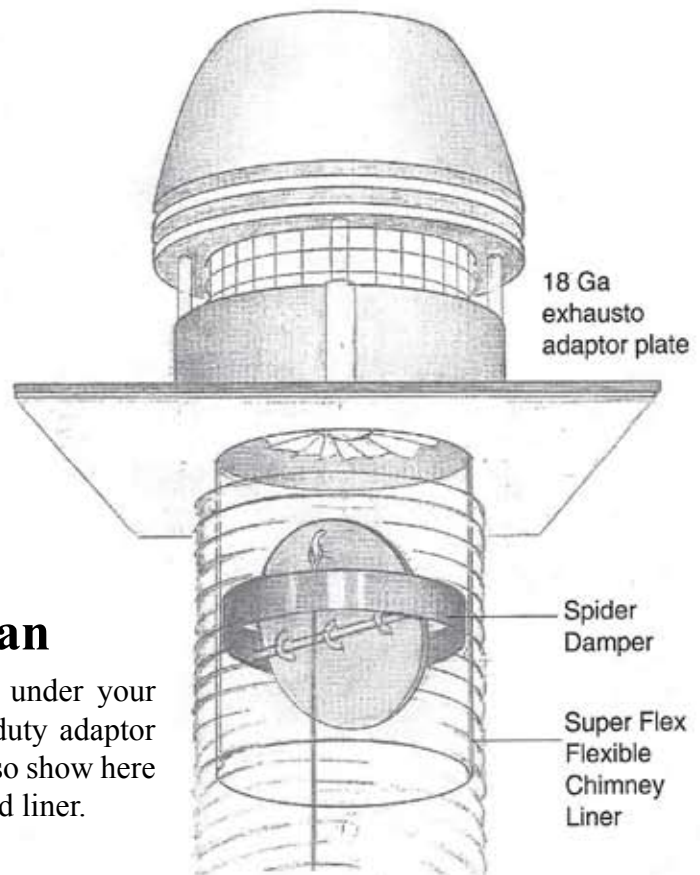

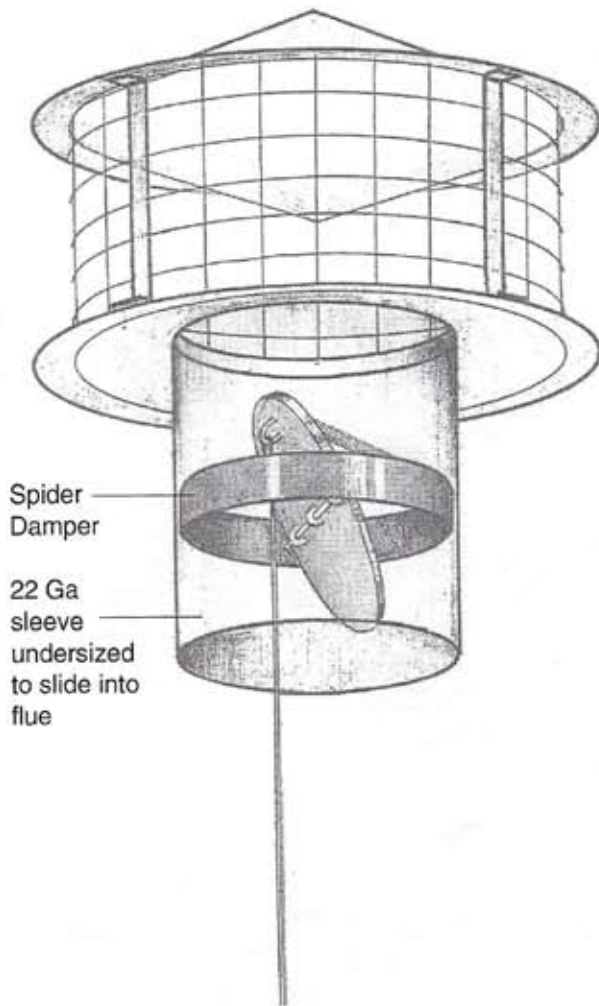

Thank you for choosing the Spider™ DROP-IN™ Damper for your application. Installation is as simple as dropping it down into the flue. Please note the arrow on one of the top support arms. Face the arrow towards the room opening to yield optimum operation. (See Diagram) The minimal space between the outer damper ring and your existing flue wall exists for thermal expansion. It can be caulked air tight with a bead of hi-temp red siliconeas illustrated. The mounting bracket that secures the stainless cable attaches in the same manner as other top mount dampers.

Please turn over

Enviro Stealth Insulated Reverse Cone Rain Cap

Sleepy Hollow Chimney Supply now offers the **Enviro II**. We have combined the Spider™ DROP-IN™ Damper within the rain cap. Superior weather protection with one piece installation. The Spider™ DROP-IN Damper is now available with all versions of the Enviro Stealth Family of rain caps. Superior to any cap available.

Exhausto Chimney Fan

Consider the Spider™ DROP-IN™ Damper under your Exhausto Fan. Illustrated here is our heavy duty adaptor fan plate with sleeve mounting the damper. Also show here is the connection to a Super Flex® interlocked liner.
